Education

Carnegie Mellon University, School of Computer Science Expected graduation: May 2025
BS in Computer Science with concentration in Machine Learning.
GPA: 4.0, Dean's List: Fall 2021 – Present.
Coursework: Software Engineering (17-313), Computer Systems (15-213), Distributed Systems (15-440), Algorithms & Data Structures (15-210), Program Analysis (17-355), Intro to Machine Learning (PhD, 10-701), Deep Learning (10-417).

Experience

Software Engineering Intern, InterSystems Summer 2022, Summer 2023
Summer 2023

- Designed and developed a dashboard for a version control application using Angular and SQL.
- Effectively communicated with stakeholders to obtain specifications and feedback.
- Helped identify 3000+ problems in the usage of the application and drive action to fix them.
- After finishing the project early, fixed multiple bugs within the application.

Summer 2022

- Implemented automatic end-to-end testing for a product evaluation tool using Cypress.
- Identified and fixed over 10 bugs in the application.
- Integrated end-to-end testing into the Jenkins CI pipeline.
- Authored documentation and conducted live demos to promote further adoption of the tool.

Software Developer & Project Lead, ScottyLabs September 2021 – Present

- Developing and maintaining the registration and judging systems for TartanHacks, Pittsburgh's largest hackathon.
- Leveraging TypeScript, Next.js, React, Prisma and MongoDB to ensure a smooth experience for 350+ participants.
- As a project lead for the registration system, choosing the direction of the project and mentoring new members.

Software Engineering Intern, CMU CS Academy January – May 2023

- Developed features and resolved bugs in a web-based platform for teaching computer science.
- Used JavaScript, React and Django to implement features such as media preview, plagiarism detection and exam mode.
- Addressed over 20 bugs and enhanced application accessibility.
- Advocated for and facilitated the adoption of TypeScript in the project.

Research Assistant, CMU Language Technologies Institute May 2022 – Present

- Working on research in Multimodal and Meta-learning.
- Formulating hypotheses and testing them using Python, PyTorch, TensorFlow and JAX.
- Achieved state-of-the-art results on several multimodal datasets.

Skills

Languages: JavaScript/TypeScript, HTML/CSS, Python, SQL, C, C++, Go, Bash, Java

Frameworks: React, Next.js, Tailwind, Angular, Django, Express, Prisma, Jest, Cypress, PyTorch, TensorFlow, JAX

Tools: Linux, MongoDB, MySQL, Git, Perforce, Jenkins, Vim, LaTeX, Typst

Soft Skills: Teamwork, communication, adaptability, work ethic, attention to detail
